DETAILED ACTION

Response to Amendment

1. Claims 1-56 are currently pending in this application.

Response to Arguments

2. Applicant's arguments filed 12/8/2005 have been fully considered but they are not persuasive. The applicant argues the following points: a) the phrase "navigating away from" refers only to going to another URL without opening a new browser window; and b) the claimed invention uses a different determination for late requests than the determination that is it uses for regular requests.
3. As to point a), the Examiner disagrees for the same reasons previously pointed out.
4. As to point b), the Examiner disagrees with the statement that the claimed late request is different from the claimed regular request. The desired maximum as claimed cannot be a true maximum otherwise the scarce resource would not be "able to accommodate immediate access by said late requester" because it would be impossible to grant access to a resource if the resource were operating at its maximum. Therefore, "desired maximum" can only be interpreted as so arbitrary value that is below the actual maximum capacity of the resource. So the processes as claimed for accommodating late and regular requests are the same because both processes check to see if the resource is available and if not queue the request.

Claim Rejections - 35 USC § 103

Art Unit: 2142

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-15, 19-35, and 39-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 6,606,661 to Agrawal et al. in view of U.S. Patent Number 6,389,028 to Bondarenko et al..

7. Claims 1-15, 19-35, 39-40, 42-53, and 55 are rejected for reasons presented in the previous office action.

8. Amended claims 41, 54, and 56 are rejected for reasons pointed out in the previous rejection of claim 1.

9. Claims 16-18 and 36-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 6,606,661 to Agrawal et al. in view of U.S. Patent Number 6,389,028 to Bondarenko et al. in view of U.S. Patent Number 6,011,537 to Slotznick.

10. Claims 16-18 and 36-38 are rejected for reasons presented in the previous office action.

Conclusion

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2142

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
